

PTC (Nasdaq: PMTC), The Product Development Company®, develops, markets and supports product development software solutions and related services that help companies achieve their product development strategies and optimize their processes. Using the company's tightly integrated CAD and enterprise PLM solutions, organizations are better able to create and manage product information throughout the lifecycle for optimal product development success. FY 2010 revenue: \$1,010 million (9/30/10). For more information on PTC, please visit <http://www.ptc.com>.

## **Graduate Software Consultant**

*Accelerate your Career with a Trainee Program for Graduates at PTC*

PTC is looking for talented, engaged and career-minded graduates to join our Global Services consulting organization.

Upon joining PTC, you will participate in a unique and extensive 6 month development program covering our products and implementation processes while gaining valuable exposure to our global customers. Upon graduation from the training program, you will work as part of a global team providing consulting and implementation services to our customers throughout Europe and the world.

PTC offers a challenging, fast-paced environment where you will work with many of the world's largest companies leveraging our industry-leading technologies. As a member of the PTC Global Services consulting team, you will have a substantial opportunity to grow and advance your career along consulting, technical, management, or related paths through comprehensive training programs and project experience.

### **Primary Responsibilities:**

- Participate in all phases of implementing PTC PLM (Windchill), MCAD (Pro/ENGINEER), and related products, including installation, configuration, administration, testing and production support.
- Ability to work with PTC on-site and off-site teams as well as customer stakeholders in a highly professional manner which represents PTC's values and mission
- Ability to configure and deploy PTC products leveraging a variety of technical and/or programming skills, including Java, JavaScript, HTML, XML, SQL, Unix, Ant, Microsoft Server, Microsoft SharePoint.
- Effectively communicate status and activities with project teams.

### **Experience and Requirements**

- All candidates must be able to accommodate a start date in October 2011 and be able to reside in Germany for the duration of the 6 month development period (Munich area).
- Degree in Engineering or Computer Science (with engineering focus) or an equivalent mix of experience and technical certification, typically to 1 year experience in a related field.
- Demonstrated track record of success, leadership, and teamwork
- Programming experience in Java, HTML, and XML
- Exposure to CAD tools (Pro/ENGINEER) and product design principals would be an advantage.
- Very good English communication skills (oral and written).
- Desire and ability to travel extensively (75 – 80%)

### **Why is this an exciting opportunity?**

- Dynamic and challenging environment with ability to develop and grow in a highly qualified team
- Working in multi-cultural teams and global company
- Engaged with innovative software products well known in the IT market
- Competitive compensation and benefits
